PROFESSIONAL EXPERIENCE

Software Engineer — WebbyWolf Innovations

Jul 2025 – Present · Remote

- Engineered frontend architecture for two production SaaS products, Aeox and Linkova, in Next.js App Router, React, TypeScript and Tailwind CSS.
- Built a reusable component library adopted across both products, cutting build time for new features by approximately 30%.
- Integrated REST APIs and Supabase auth, sessions and real-time data; drove API contract design and PostgreSQL schema modelling.
- Applied SSR, route-level caching and bundle optimization to cut load times and lift Core Web Vitals and organic indexing.
- Shipped in two-week Agile sprints with peer code review, Git/GitHub branching and continuous deployment on Vercel.

Web3 Development Intern — MetaCrafters

Jun 2023 – Sep 2023 · Remote

- Authored, tested and deployed Solidity smart contracts on EVM test networks; built React dApp frontends reading and writing on-chain state.
- Earned a \$175 merit scholarship and selection into the MetaCrafters talent collective on completing the blockchain engineering track.

PROJECTS

Aeox — AI Answer Engine Optimization Platform | Live | Case study

Next.js · TypeScript · Supabase · PostgreSQL · GSAP · Tailwind CSS

- Built server-rendered dashboards for daily-refreshed ranking, share-of-voice and sentiment data across 8 AI answer engines.
- Implemented the actions kanban and outreach pipeline UI that turn tracking data into a ranked action plan.

Linkova — Publisher & Backlink Marketplace | Live | Case study

Next.js · TypeScript · Supabase · PostgreSQL · AI SDK · TipTap · next-intl · Tailwind CSS

- Engineered faceted search over a 250,000+ publisher catalog across 150+ countries on domain rating, traffic, country, topic and budget.
- Delivered the interactive world-coverage map, the TipTap article editor, EN/DE localisation and the cart-to-live-URL order workflow.

CVora — AI Resume Builder (own product) | Live | Case study

Next.js · TypeScript · Supabase · AI SDK · Puppeteer · Tailwind CSS

- Architected a form-to-preview editor with live rendering and an AI rewrite that tailors bullets and keywords to a pasted job description.
- Implemented ATS match scoring with keyword coverage, version history per rewrite and pixel-accurate PDF export via Puppeteer.

Also built: TradeVerse — real-time trading platform (React, Node.js, WebSockets, MongoDB) · Real Estate Marketplace (Next.js, Supabase, PostgreSQL) · MultiLangDetect audio CNN (Python, TensorFlow, Flask).
